### DETAILED ACTION

1. Applicant's amendment, filed 10/12/01 (Paper NO:6), is acknowledged.

*Claims 1-13 are pending.*

### ***Restriction Requirement***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted:

- I. Claim 1, drawn to antigen of a phagocyte.
  - II. Claims 2-4, drawn to a phagocyte-recognizing agent and a pharmaceutical composition comprising a phagocyte-recognizing agent.
  - III. Claims 5-13, drawn to a method of detecting a preactivated phagocyte.
3. The inventions listed as Groups I-XLIX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:
- A) The special technical feature of group I is considered an antigen of a phagocyte;
  - B) The special technical feature of group II is considered a phagocyte-recognizing agent and a pharmaceutical composition comprising a phagocyte-recognizing agent;
  - C) The special technical feature of group III is considered a a method of detecting a preactivated phagocyte.

Accordingly, Groups I – III are not so linked by the same or a corresponding special technical feature as to form a single inventive concept and so lack unity of invention.

### **Species Election**

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

5. If Group III is elected, applicant is required to elect a specific method of detecting a preactivated phagocyte wherein: A) a specific fluorescent agent is selected from the group recited in Claim 9; B) a specific pathological condition is selected from the group recited in Claim 12.

These species are distinct because the specific methods of detecting a preactivated phagocyte differ with respect to the specific fluorescent agent and a specific pathological condition of the method; thus each specific method employing a specific fluorescent agent and a specific pathological condition represents patentably distinct subject matter. Furthermore, the examination of : A) a specific fluorescent agent selected from the group recited in Claim 9; B) a specific pathological condition selected from the group recited in Claim 12 in the methods of detecting a preactivated phagocyte, would require different searches in the scientific literature.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

Art Unit: 1644

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michail Belyavskiy whose telephone number is (703) 308-4232. The examiner can normally be reached Monday through Friday from 9:00 AM to 5:30 PM. A message may be left on the examiner's voice mail service.
